

ABSTRACT

A stack (130) of absorbent articles (101) including at least a first absorbent article and a second absorbent article adjacent in the stack (130), each article (101) being individually wrapped in a wrapping cover (100) comprising a container part (112) and a lid part (111) releasably attached to the outside of the container part (112). The lid part (111) on the second absorbent article is attached to the wrapping cover (100) of the first absorbent article by a releasable attachment (133) which is stronger than the attachment between the lid part (111) and the container part (112) on the wrapping cover (100) of the second absorbent article.
